 - o Services
 - Network of dedicated research professionals across a wide range of pediatric and adult indications, including specialty care and primary care settings
 - Supports pharmaceutical, device and investigator-initiated research throughout MultiCare Health System and with other partners in the Pacific Northwest
 - Specialized expertise in all areas of research administration and conducting Phase I – IV clinical trials
 - Referring providers stay involved with their patients throughout the research process - patient receives specialist care close to home while providers receive regular updates and access to lab and panel results
 - Investigator services include research training, regulatory support, budget & contract negotiation, federal grants management, epidemiology, research librarian, manuscript preparation and more
 - Opportunities for providers to perform their own research in their own clinics with support from Research Institute staff, contact us to get started
