

Robotic-Assisted Surgery at Good Samaritan Hospital

MultiCare Good Samaritan Hospital

401 15th Ave. SE

Puyallup, WA 98372

Phone: 253-697-4000

Improved surgical outcomes through minimally invasive care

MultiCare Good Samaritan Hospital is committed to providing patients with the best options for their surgical needs. We are proud to offer Intuitive's da Vinci® advanced robotic surgical system for minimally invasive surgery, resulting in shorter surgery times, faster recovery times, fewer complications and less pain and discomfort for patients.

The da Vinci surgical system allows our surgeons to perform a wide variety of surgical procedures through one or a few small incisions — with precision, flexibility and control. Surgeons have high-definition 3D vision, a magnified view and robotic and computer assistance. While seated at the console, surgeons control instruments with fully wristed dexterity inspired by the human hand — but with greater range of motion.

Robotic-assisted surgery clinician specialties:

- **Colorectal surgery:** Colectomy and rectal resection, rectal prolapse repair
- **General surgery:** Ventral and inguinal hernia repair, complex abdominal wall reconstruction, foregut, gallbladder and appendix surgery
- **Gynecology surgery:** Hysterectomy, endometriosis resection, fibroid removal (myomectomy), ovarian cystectomy (ovarian cyst removal), salpingectomy or salpingectomy-oophorectomy (removal of one or both fallopian tubes/ovaries, pelvic organ prolapse)
- **Urology surgery:** Kidney blockage surgery, kidney surgery and prostate surgery

Benefits of robotic-assisted surgery:

- Reduced length of stay in the hospital
- Reduction in pain leading to reduced number of opioids prescribed/taken and faster return to normal life
- Reduction in blood loss during surgery
- Lower conversion rates
- Able to treat more complex patients (high BMI, previous abdominal surgery, comorbidities, etc.) due to enhanced visualization, wristed instrumentation and advanced energy devices

For more information about robotic surgery at MultiCare Good Samaritan Hospital, call 253-697-4000.
