## Unit Information

### Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- Activity such as patient admissions, discharges, and transfers

Description:

Allenmore IR serves inpatient, outpatient and ER patients. Allenmore IR is considered "IR light" due to the limitations of the current equipment. Common procedures include port placement, CT or US guided biopsies, paracentesis, thoracentesis, drain placements.

- Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

Acuity of patients range from stable outpatients to ICU level inpatients.

Skill mix

Description:

RN only

Level of experience of nursing and patient care staff

Description:

All IR RNs are required to have a minimum of 3 years of critical care, ED or procedural experience.

Need for specialized or intensive equipment

Description:

Radiology procedures performed using fluoroscopy, US, or CT guidance.

- Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

One main IR control room in close proximity to xray, CT, MR and IR suite. Short stay patients admitted and recovered through the Day Surgery Unit, also located on the same floor.

- Other

Description:

Minimum staffing utilized daily, Monday-Friday. One RN, one IR technologist and one provider.
