Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

Activity such as patient admissions, discharges, and transfers

Description:
 CCL/IR is a procedural unit functioning in 3-4 procedural rooms at any given time. Procedure lengths vary from 30 minutes to multiple hours depending on complexity with an average length of 60 minutes. Patients are recieved from and returned to CVAR, Peri-op and inpatient units as directed by ordering physician.

Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

Patient requiring procedural sedation are cared for at a 1:1 ratio by nursing staff in accordance with policy.

Skill mix

Description:

Level of experience of nursing and patient care staff

Description:

RN's are trained in Procedural Sedation. All staff are ACLS trained.

Need for specialized or intensive equipment

Description:

Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

Other
