Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

Activity such as patient admissions, discharges, and transfers

Description:

This is an outpatient clinic, patients are seen at scheduled appointment time and seen in serial appointments until wounds are healed or care is established elsewhere.

Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:
patients are seen in this outpatient clinic weekly to monthly for assessment and orders for wound care at home between visits. Complex and chronic wounds are served in the provider run clinic. Treatments including, but not limited to; debridement, negative pressure wound therapy, advance wound modalities and basic wound dressings may be performed.

Skill mix

Description:
RNs and LPNs are used interchangeably in the OP clinic; so backfill could be with either resulting in all LPN or all RN staff on any given day. The number of nurses fluctuate based on patient volumes.

Level of experience of nursing and patient care staff

Description:
This clinic is staffed by physician, ARNP, RN, LPN

Need for specialized or intensive equipment

Description:
No specialized equipment necessary

Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:
The wound clinic is a HOPD located in the 1 main building. There is a nurses station with medication prep area, HBO room and 6 treatment room.

Other

Description:

The ANM has some direct care responsibility and shares oversight of both OP and IP wound departments
