Unit Information

Factors Considered in the Development of the Unit Staffing Plan (Check all that apply):

- Activity such as patient admissions, discharges, and transfers

Description:

ACU/PACU- Care and treatment of pediatric patients requiring surgery under general anesthesia in the outpatient and inpatient setting.

Sedation Services- Care and treatment of pediatric patients requiring deep sedation in the outpatient and inpatient setting.

GI LAB- Care and treatment of pediatric patients requiring GI procedures in the outpatient and inpatient setting. All areas follow the American Society of Perianesthesia Nursing Standards Practice Recommendations (ASPAN) for nursing practice.

- Patient acuity level, intensity of care needs, and the type of care to be delivered on each shift

Description:

ACU/PACU- The nursing staff provide pre-surgical and post-surgical nursing services for both phase 1 and phase 2 through discharge or admission to hospital. Serving children with both complicated and uncomplicated medical histories.

Sedation Services- The nursing staff provide pre-procedural, intra-procedural, and post-procedural care for both complicated and uncomplicated medical histories.

GI LAB- The nursing staff provide care and treatment for pediatric patients requiring GI procedures and assist the the GI physician during the procedure.

Skill mix

Description:

ACU- RNs and a patient care tech.

PACU- All RNs.

Sedation Services- RNs, patient care tech, and Intensivists.

GI LAB- RNs, LPNs, and GI Physicians.

Level of experience of nursing and patient care staff

Description:

Skill mix varies. Staff background experience varies from Med Surg, Emergency Department, PICU and Perianesthesia.

RN experiences range from 2-40 years experience. Over 80% of RNs with 5 years or greater RN experience. All staff are PALS certified.

Need for specialized or intensive equipment

Description:

Patient rooms all have wall oxygen, suction, air, and cardiac/respiration/Oxygen saturation monitoring.

The PACU/Sedation area have CO2 monitoring if needed.

Sedation Services has the ability to use Nurse Adminstered Nitrous Oxide (portable) and they have WAG lines in selected rooms.

- Architecture and geography of the unit such as placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment

Description:

ACU is located on the 5th floor Phillip Wing in the main hospital and has 11 private rooms with 2 nurses stations, one med prep room, and soiled utility.

PACU is located on the 5th floor Phillip Wing in the main hospital and has 6 open bays, a clean utility and a dirty utility room.

Sedation Services is located on the 7th floor of the Olympic Wing in the main hospital and has 2 procedure rooms, 9 private patient rooms, 2 nurses stations, HLD room, medication room and a equipment storage room. Sedation also has 3 bays on the 3rd floor of the Commencement Wing outside of MRI.

- Other

Description:

With MB being a level 2 trauma center, the MB PACU is available 24/7 and is staffed during the day with scheduled RN staff and after hours with On Call RN staff.
